CAREER SUMMARY

2019 – Present
full-time job

Software Developer

PACK Solutions - Avignon, France

- Participating to daily meetings for the scheduling of priorities, using JIRA ticketing system.
- Fixing bugs and implementing new features in Java 8 (with Spring and Hibernate) and PL/SQL to our in-house web application dedicated to the management of over 400k life annuities (or lump-sum), testing with unit and integration tests (JUnit).
- Providing technical support to our front-office by querying data in our production Oracle database using SQL.
- Tracking and fixing issues of our payment system for life annuities (centered around Spring Batch and using Apache Kafka for parallel processing) which can occur during daily batch payment processing.

Java 8 / PL/SQL / Spring / Hibernate / Kafka

2017
4-month internship

VBA Developer

Sanofi - Montpellier, France

- Automated manual processes performed on an MS Access application resulting in increased workers' productivity and less error-prone tasks.
- Modified UI to improve usability and reduce data entry mistakes according to UX design guidelines.
- Documenting VBA source code to make future maintenance easier.

VBA / SQL / MS Access

2016
3-month internship

VBA Developer

Domaine des Coteaux - Generac, France

- Created an application to keep track of rented plastic fruit boxes in order to reduce thefts and identify losses throughout the supply chain.
- Fixed numerous bugs related to forms, reports and data export and import on applications for HR management, vehicle fleet and machinery maintenance activities.

VBA / SQL / MS Access
